De homini corporis fabrica Wikipedia

De homini corporis fabrica libri septem (Latin for "On the fabric of the human body in seven books") is a set of books on human anatomy written by Andreas Vesalius (1514-1564) and published in 1543. It was a major advance in the history of anatomy over the long-dominant work of Galen, and presented itself as such.

Books About the Human Body that Aren't Boring bookriot.com

The human body is especially interesting in this regard, since different writers bring different perspectives to writing about the body. Each book is unique in that way, even if basic bodily processes and functions are always described the same way. I find it to be a testament to the intricacies of the body that there are able to be so many books on the human body, all so different in their own ways.

The Story of the Human Body Evolution Health and

The Story of the Human Body reads like a series of lectures for a college class. There are straight-ahead facts mixed with occasional jokes and analogies along the way. This isn't the deepest or best-written piece of science

writing, but it does cover a decent amount of interesting ground.
